While the name "Pink Moon" might suggest a rosy-colored Moon, the reality is a bit less magical. The name comes from the early spring bloom of a wildflower native to eastern North America: *Phlox subulata*, commonly known as creeping phlox or moss phlox. This flower, often called "moss pink," was in full bloom around April's Full Moon.

The aim of an arithmagon is to work out which numbers go in the empty circles. The numbers in the square boxes are made by adding together the numbers in the circles either side. For example, if the number in the square box was 10 you could try 6 and 4, but the numbers must also add up on the other edges, making this more difficult than it first appears.
